

AMS Planning and Purchase

AMS/PLG/BR/07-08

2 April 2007

To Whom Ever it may concern.

We confirm here with that the intelligent motor controller POWRBOSS, Model PBI 132, have been tested satisfactorily for 5 weeks, and then installed on our press having 110 KW "Crompton" make motor, over two months ago.

The equipment has proved satisfactory performance, and reliability to our rigorous working requirements.

No load current drawn by motor 110 amps, was reduced to 62 amps, and the KWH is reduced from 47.88 Kwh to 38.40 Kwh on installation of Powerboss.

We have observed an average savings of 20% on the above said machine.

This letter is issued on request from SARVESH ENGINEERING, Pune, who has supplied the equipment and done the installation.

A handwritten signature in black ink that reads 'Rajmohan' with a horizontal line underneath.
